

WeRateDogs Analysis and Insights

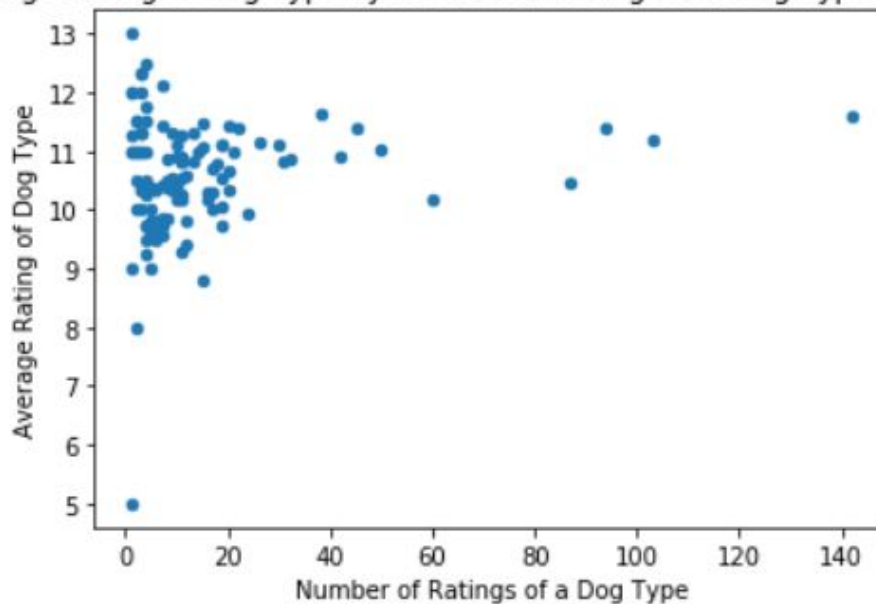

This is an amazing project, and we got some nice insights from the datasets.

1. Golden retriever is the dog which is most rate.

2. Same can be obtained from below scatter plot, where Golden retriever has received the highest number of ratings.

Average Rating of Dog Type by Number of Ratings of a Dog Type Scatter Plot

3. Number of retweets is quite high. However, there is no clear relation between retweet and ratings.
